Communication

Date	20 October 2026
Individual Project / Name	Avni Agrawal
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	1 Mark

Communication Plan:

Effective communication is important for the successful development and demonstration of the **Electric Vehicle Market Performance & Insights** project. This plan describes how project progress, data issues, dashboard feedback, and final demonstration updates can be communicated. Since this is an individual project, communication is managed by the student with the project guide or evaluator as required.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Project Progress Review	Weekly	Personal checklist / notes	Student; Project Guide	Track dashboard development and planned tasks.
2	Progress Update	Weekly / Milestone-based	Email / In-person update	Student; Project Guide	Share completed analysis, charts, and pending work.
3	Issue / Data Quality Discussion	As Needed	Notebook / Excel notes; Email	Student; Project Guide if needed	Record missing values, data errors, and analysis issues.
4	Dashboard Feedback Review	At Key Milestones	Dashboard walkthrough / Meeting	Student; Guide / Evaluator	Collect feedback on KPIs, filters, charts, and usability.
5	Final Demo Rehearsal	Once before submission	Dashboard / Presentation	Student; Guide / Evaluator if available	Check insights, navigation, explanations, and presentation flow.
6	Final Submission Update	At Submission	Email / LMS / Submission Portal	Student; Evaluator	Confirm final report, dashboard, and supporting files are submitted.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Incomplete or inconsistent EV market data.	Validate data types, identify missing values, and document any assumptions before analysis.
2	Difficulty selecting clear KPIs and visualizations.	Prioritize sales, market share, battery type, driving range, manufacturing country, and customer ratings; use simple charts and filters.
3	Limited time for testing and preparing the final demonstration.	Use a task checklist, test dashboard filters and calculations, and rehearse the key insights before submission.

Note: This communication plan is tailored for an individual project. Adjust channels, participants, and challenge resolutions to match what you actually used.
